

Hello World, how are you? This is my first LaTeX document. This is a sentence. This is another sentence.

This is a new paragraph. In this paragraph I will include the following list:

- the first item in the list
- the second item
- the third item

Now I return to writing sentences. See how cool this is? What if I want a numbered list? That is easy use the enumerate option.

This is a numbered list

1. first numbered item
2. next numbered item
3. last numbered item

A LaTeX table:

1	2	3
4	5	6
7	8	9
